Question	Correct/Incorrect
1. The number sixty-five can be written as:	Incorrect (d)
2. 20, 18, 16, 14, _____, _____, _____ If the pattern continues, the next numbers will be....	Correct
3. 60, 65, 70, 75, _____, _____, _____ If the pattern continues, the next numbers will be...	Incorrect (a)
4. How many blocks are circled?	Incorrect (a)
5. About how many people can fit in 2 cars if everyone wears a seatbelt?	Incorrect (a)
6. How many? _____	Incorrect (d)
7. 7 children line up for a drink. Morgan is first (1st) in line at the fountain. Which child is fifth (5th) in line from the fountain?	Incorrect (b)
8. Rides at the fair cost 3 tickets. Ben wanted to go on four rides. How many tickets did Ben need?	Incorrect (a)
9. 3, 7, 11, 15, _____, _____, _____, _____. If the pattern continues, the next numbers will be	Correct
10. Allan has 9 nickels. How much money does he have altogether?	Correct
11. Which is a set of all even numbers?	Correct
12. Put these numbers in order from least to greatest.	Incorrect (c)
13. How many days in 1 week?	Incorrect (c)
14. Estimate the length of this bug in units	Incorrect (d)
15. Bill has to organize the animals from lightest to heaviest. What would be the correct order?	Correct
16. How many months in 1 year?	Incorrect (d)
17. Janis' birthday is on July 20th. What day of the week is her birthday?	Correct
18. Which item is closest in mass to a box of crayons?	Correct
19. How many faces are on the cube below?	Correct
20. What was the favourite sport?	Correct
21. How many students liked baseball and hockey altogether?	Correct
22. How many more students liked soccer than basketball?	Incorrect (c)
23. Which of these shapes is a triangle?	Incorrect (a)
24. Katie sorted these shapes into 2 sets. Which shape belongs to set A?	Incorrect (c)
Score: 10 (41.7%)
