

UPDATE #15 – French Versions of DMA Tests Now Available.

December 1st, 2008

The Island Numeracy Consortium recently completed the French versions of the DMA tests for grades End of Grade 2 - Beginning of Grade 3 to End of Grade 9 - Beginning of Grade 10, and we have put the multiple-choice questions from each online, so now your French immersion classes can participate.

This means the following changes:

1. Students, when logging in to their tests, will choose whether they want the English version or the French version of a particular test.
2. Reports, for the short term, will be in English; we are working on enabling reports using the French questions.

User Guides updates - current versions

As we modify and streamline our system to make it easier to use for teachers, school administrators and district coordinators, we change and add features. When we do so, we immediately update the appropriate user's guides. We advise that, when you want to access a user's guide, simply click on the appropriate link in the menus on the left of the Admin Zone page to get the most up-to-date version (rather than accessing an older version that might be on your hard drive). In doing so, you will get the most current information about using our system.
