

## **Update #4 – New Report Added to Report Menu**

April 4<sup>th</sup>, 2008

### **1. New report**

A new report **Division Answer Frequency Report** is now available through the report generator. This report shows the distribution of answers (ABCD) by question, with the correct answer in bold. Educators can use this table to determine if there are anomalies in the answer data - e.g.. for one particular question, a significant number of students chose a particular wrong answer. Information from this report will enable teachers to address specific problem areas.

To access this new report, simply choose it from the **Report Type:** listbox when generating reports. Note that you can generate this report for data already in our system.

### **2. District Coordinator Orientation sessions**

In preparation for the Summative (Spring) session, we are offering, free of charge, orientation sessions for District Coordinators and Assistant Coordinators. All topics of interest to the coordinators will be covered, with particular emphasis on uploading student data and generating reports. We offer these sessions individually to each school district, and they are conducted by telephone. To set up an appointment, simply phone us at 604 420-7379.

### **3. Suggestions for reports and databases**

Our reporting capability is quite powerful and extensive, so if you would like to see the DMA test data presented in a certain format, please feel free to contact us to discuss your idea. Many of the current reports now available were created as a result of suggestions by our users.
